

AIR QUALITY DEPARTMENT
1001 North Central Avenue, Suite 695
Phoenix, Arizona 85004
602.506.3476
602.506.6179 (FAX)

Notice:
**Informal Stakeholder Workshops,
Oral Proceedings, Public Hearings
First Quarter 2005**

Maricopa County Air Quality Department will conduct Informal Stakeholder Workshops, Oral Proceedings, and Public Hearings regarding the Maricopa County Air Pollution Control Regulations according to the schedule provided in this notice. If the information in this notice changes, the change(s) will be announced on the Internet (at the web site address listed below) and on Maricopa County's Workshop Update Line (listed below).

All **Workshops** and **Oral Proceedings** will be held at 1001 North Central Avenue, Phoenix, Arizona, **Room 560** unless otherwise noted. Draft rules may be picked up at 1001 North Central Avenue, **Suite #695**, Phoenix, Arizona, or on the web at <http://www.maricopa.gov/envsvc/air/workshops.asp>. For current information on workshop times and locations, call our Workshop Update Line at **602.506.0169**. For questions or additional information, call the contact person listed or **602.506.7396**.

Public Hearings are held at: Maricopa County Board of Supervisors' Auditorium
205 West Jefferson Street, Phoenix, Arizona

For rules going to Public Hearing, a summary of the proposed action, a summary of comments and departmental responses, and a demonstration of compliance with A.R.S. 49 Subpart 112 A or 112 B will be available along with the draft rules at 1001 North Central Avenue, Suite #695, Phoenix, Arizona.

Rules are effective as of the date of approval by the Board of Supervisors unless an effective date for certain revisions is otherwise noted within the text of the rule.

A sign language interpreter, alternative form materials, or infrared assistive listening devices will be made available at the Public Workshops and Hearings upon request with 72 hours notice. Additional reasonable accommodations will be made available to the extent possible within the time frame of the request. Requests should be made to 602.506.4057.

RULE SUMMARY FOR INFORMAL STAKEHOLDER WORKSHOP

Rule 280

Fees

Maricopa County will propose to amend Rule 280 in order to update fees to account for the loss of grant monies. Grant monies established by Arizona Revised Statutes (A.R.S.) §49-551 were relied upon during the 2002 workload analysis and fee revisions; however, these grant monies have not been appropriated by the legislature for the past 2 years. In addition, fees will be updated to reflect increased indirect costs.

RULE SUMMARIES FOR ORAL PROCEEDINGS

Rule 316

Nonmetallic Mineral Processing

Maricopa County is proposing to amend Rule 316 in order to address Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan Revision.

Rule 358

Polystyrene Foam Operations

Historically, the Maricopa County Air Pollution Control Regulations have not contained a source-specific rule to address pollutants from polystyrene foam operations. New proposed Rule 358 will address volatile organic carbon (VOC) emissions that are emitted from the manufacture of expanded-polystyrene (EPS) foam products. Section 182(a)(2)(A) of the Clean Air Act requires that Reasonable Available Control Technology (RACT) be applied in ozone nonattainment areas to each stationary facility that is a major source of VOC emissions. Maricopa County contains an ozone nonattainment area previously classified as "serious" under the former "one-hour" standard. The area is now classified as "basic" under the current 8-hour standard. Maricopa County has identified four facilities that expand polystyrene (EPS) to make foam products, each of whose uncontrolled VOC emissions exceed the major source threshold, 50 tons per year. New proposed Rule 358 will require these facilities to choose from specific reasonably available control technologies, while taking into account factors unique to Maricopa County.

RULE SUMMARIES FOR PUBLIC HEARINGS

Rule 310.01

Fugitive Dust From Open Areas, Vacant Lots, Unpaved Parking Lots, And Unpaved Roads

Maricopa County is proposing to amend Rule 310.01 in order to address Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan Revision.

Rule 325

Brick And Structural Clay Products Manufacturing

New Rule 325 will be adopted on March 16, 2005. The rule establishes numerical standards, based upon the throughput of the kiln, which limit the emissions of particulate matter from these kilns used in the manufacturing of brick and structural clay product manufacturing processes. The rule applies to any existing, new, or reconstructed kiln that is used in these industries. These industries have previously been regulated by Rule 311 (Particulate Matter From Process Industries). Maricopa County is proposing to incorporate Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in Salt River PM₁₀ State Implementation Plan Revision. There are exemptions for kilns used exclusively for research and development. The rule also contains a 20% opacity standard and recordkeeping requirements that include the amount of kiln feed fired and the hours of operation.
